STRIKER 500 SC

SELECTIVE HERBICIDE BY SANONDA

GENERAL INSTRUCTIONS

Read label carefully prior to opening. Thoroughly clean all traces of this product from application equipment immediately after use otherwise injury to desirable vegetation may result when equipment is used again. Flush tank, pump hose and boom with several changes of water after removing nozzle tip and screens (clean these parts separately).

RESISTANT WEEDS WARNING

STRIKER* 500 SC Selective Herbicide by Sanonda is a member of the urea group of herbicides. STRIKER* 500 SC Selective Herbicide by Sanonda has the photosynthesis at photosystem II inhibitor mode of action. For weed resistance management, STRIKER* 500 SC Selective Herbicide by Sanonda is a Group C herbicide. Some naturally occurring weed bio-types resistant to STRIKER* 500 SC Selective Herbicide by Sanonda and other photosynthesis at photosystem II inhibitor herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly.

These resistant weeds will not be controlled by STRIKER* 500 SC Selective Herbicide by Sanonda or other photosynthesis at photosystem II inhibitor herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Sanonda (Australia) Pty. Ltd. accepts no liability for any losses that may result from the failure of STRIKER* 500 SC Selective Herbicide by Sanonda to control resistant weeds.

MIXING

Stir product or invert container several times before using as settling may occur after storage for some weeks. To ensure even mixing, half fill the spray tank with clean water and add the required amount of product. Agitate thoroughly and continue agitating while filling the tank. Agitate continuously while carrying out spray operations. Reseal part used container immediately after use.

COMPATIBILITY

This product may be combined in the spray tank with the following herbicides: Paraquat* (paraquat), Diquat, Amitrole, Aminoz* 500 (2, 4-D Amine), Anti* 500 SC (Atrazine), Topo* 500 SC (Simazine) and MCPA herbicides. This product is not compatible with glyphosate. When mixing any of the above herbicides with this product, add when the spray tank containing the STRIKER* 500 SC spray mixture is almost full. Agitate continuously during the spray operation. As formulations of other manufacturers' products are beyond the control of Sanonda (Australia), all mixtures should be tested prior to mixing commercial quantities.

APPLICATION

Pre-emergence of weeds: Apply to moist soil. Sufficient moisture in the form of rain or irrigation is necessary to move the chemical into the weed root zone. Post-emergence of weeds: Spray when weeds are actively growing. DO NOT use on sandy, loamy or gravelly soil unless otherwise stated, as crop damage may result.

CROP DAMAGE

If heavy rains occur following application, severe crop damage may result. Risk must be assumed by user.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

Dangerous to fish. Do not contaminate dams, rivers or streams with the pesticide or used containers. Do not use the container for any other purpose.

PROTECTION OF CROP, NATIVE AND NON-TARGET PLANTS:

Avoid spray drift and avoid using on windy days. DO NOT drain or flush equipment or spray near desirable trees or other plants, or on areas where their roots may extend, or in situations, particularly sloping areas, where by movement of treated soil or by seepage, the herbicide may be absorbed by plant roots. DO NOT use on sandy, loamy or gravelly soils, unless otherwise stated, as crop damage may result. DO NOT replant treated areas within 2 years of application unless otherwise stated. DO NOT plant other crops within one year of application to cotton.

STORAGE AND DISPOSAL

Store in the original container in a cool, dry, well ventilated area out of direct sunlight away from foodstuffs. Keep from contact with fertilisers, insecticides, fungicides and seeds. Triple rinse empty containers adding rinsate to the spray tank, or dispose of with empty container.

Puncture top, bottom and sides of empty container, then crush and bury in an approved landfill, or bury under at least 500mm of soil in a non-crop, non-pasture area away from water sources or homes.

SAFETY DIRECTIONS

Avoid contact with the skin and eyes to prevent possible irritation. Wash concentrate from skin and eyes immediately. Avoid working in and breathing spray mist. Wash exposed parts of the body after use and before eating, drinking or smoking.

Additional information is listed in the Material Safety Data Sheet.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre.

CONDITIONS OF SALE

The use of STRIKER* 500 SC Selective Herbicide by Sanonda being beyond the control of the manufacturer, no warranty expressed or implied is given by SANONDA (AUSTRALIA) PTY.LTD. regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and SANONDA (AUSTRALIA) PTY. LTD. accepts no responsibility for any consequence whatsoever resulting from the use of this product.
